

mediaXport Capture Studio System

Capture and stream live high quality, optimized content from multiple sources with the new mediaXport Capture Studio. This advanced rich media webcasting and recording solution allows you to capture and deliver rich experiences with the simple touch of a button. The mediaXport is flexible in its ability to record and webcast any presentation, lecture, training, or medical procedure in high to low resolutions. The mediaXport Capture Studio has a built-in audio and video mixer/switcher, simplifying production and reducing equipment costs, making it an affordable solution!

Features and Benefits

- ✓ User-Friendly Interface (Touch-Screen)
- ✓ One-Touch Recording & Broadcasting
- ✓ Simple Configurable Presets
- ✓ Real-Time Multi-Format Encoding
- ✓ Automated Publishing to Servers
- ✓ Simultaneous Experience Creation (Web, Mobile Device, DVD & more)
- ✓ Captures 30 fps Video (S-Video & Composite) and VGA (Analog & DVI up to 1280 x 1024)

Simple

A touch-screen interface allows you to deliver presentations effortlessly. Recordings are available instantly in a variety of formats and automation eliminates post-production needs.

Flexible

Deliver enriching experiences with multi video capture capabilities. Configurable presets put you in control of your production while viewers retain control of how they want to experience it.

Affordable

Use the mediaXport as an alternative to expensive hardware mixers, scalars, switches and control systems, or integrate it with your existing hardware. With all this functionality in one system, you will save time and money and reduce the need for technical support.

Record, Publish, and Stream Audio, Video & Data without any post-production work. Audio and video mixing is handled by Capture Studio, allowing users to employ rich media content at a low cost for a wide range of purposes.
