MT-EDU102

Integrated Amplifier

Compact 50-watt amplifier resides in wall mount for easy wiring and clean installation

Flexible Mounting Options

Mounts to single and/or dual studs (16", 18" or 24" spacing) and concrete

Cable Routing

Discretely manage signal and power cables through arm and into wall mount

AV Equipment Security

PC, MAC or control modules can be secured with security hardware

Audio Upgrade

Powerful two-channel speakers provide superior improvement over typical audio from tiny projector speakers

Universal Projector Mount

Includes universal projector mount for +/-16.5° pitch, +/-7.5° roll and 41° yaw

FEATURES

- Includes two, 25-watt two-way speakers with 5" woofer and directional tweeters
- Integrated 50-watt power amp resides within wall mount wall plate
- Multiple inputs, including separate line-level mic input
Dynamic sound range easily reaches back row without overpowering front row
- Extends from 37"-67" from the wall
- Mounts to single and/or dual wood studs (16", 18" and 24") and concrete
- Includes universal projector mount

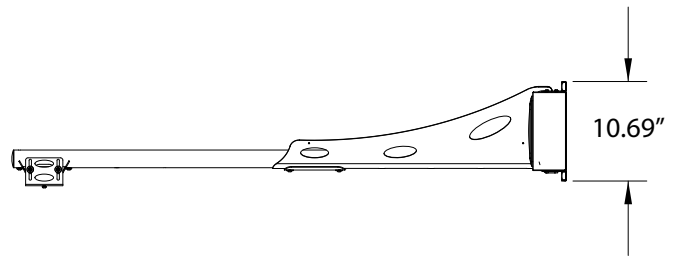

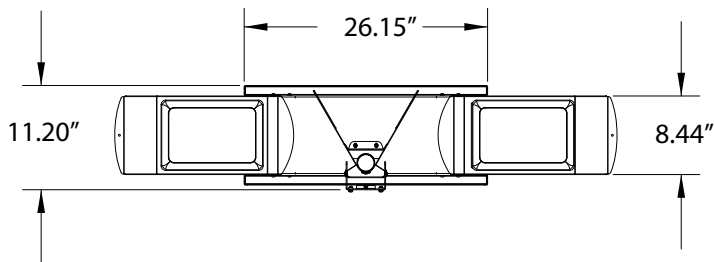

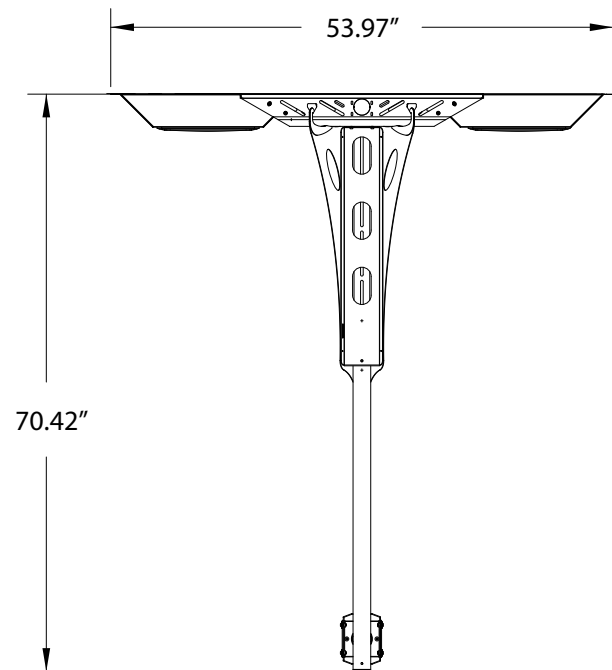

SPECIFICATIONS

Models	MT-EDU102
Weight Capacity	50 lbs.
Height	10.69"

FAQ

Works with SANYO PDG-DWL100, PDG-DXL100, PLC-WXL46, PLC-XL50A, PLC-XL51

What inputs are on the amplifier?

Two RCA inputs and a line-level microphone input are on the amplifier. Separate gain presets are integrated on the side of the chassis.

How is the sound? Will I blow away the front row to barely be heard at the back?

The sound is great! We tested dozens of speakers to find just the right ones. We tuned the ports and power levels to optimize for a standard 32' x 32' classroom with no mic feedback, distortion or blaring up close.
